## OBJECTIVE

Experienced and knowledgeable software developer with extensive practice in technology engineering and computer science looking to obtain a position that allows for the application of design skills, customer service and support abilities and critical thinking to produce software that meets all goals and objectives outlined by the customer.

## PROJECTS

### 1.Landing page

- In this I have make the responsive landing page with the help of tech stack HTML,CSS,Javascript.
- this page have some other navbar like feature, contact , home,pricing etc.
- use header,footer tag .
- <https://15797vishal.github.io/SaaS-landingPage/> 05/2023

### 2. Mail trap

- In this I have make the responsive landing page with the help of tech stack HTML,CSS,Javascript.
- this page have some other navbar like feature, contact , resources etc.
- use header,footer tag . 6/2023
- [https://15797vishal.github.io/mailtrap\\_project/](https://15797vishal.github.io/mailtrap_project/)

### 3.Podcast Platform

- user can create their own podcast with the help of this web ,and add their favorite's songs in the podcast and listen anytime .
- In this project the tech stack use the language ReactJS, Firebase for backend data store.
- <https://podcast-react-vishal.netlify.app/> 08/2023

### 4.Location based data get

- In first half page automatic users location get , and in Second half page if user want to check other location can check easily
- In this project the language use are ReactJS, CSS.
- And upload on Netlify and Github.
